## **DETAILED ACTION**

### **CLAIMS PRESENTED**

Claims 1-13, 15-25, 28-31, 34--43 are presented.

### ***Response to Arguments***

Applicant is thanked for the latest arguments. Applicant asserts that Poisson does not, rather than "cannot", teach determining whether the new properties differ from the properties already in use. This argument, of course, goes to the issue of obviousness. The Office respectfully requests Applicant to explain why this feature (of determining whether the new properties differ from the properties already in use) would not be inherent. Poisson is clearly directed to a portion of a complete system. Poisson does not forbid a functioning system. In a functioning system, this feature (of determining whether the new properties differ from the properties already in use) is necessary. Necessary features are inherent.

Perhaps Applicant does not agree that this feature is necessary. The Office's view is shaped from the fact that keeping track of properties is necessary and that such keeping track of new properties would require this feature (of determining whether the new properties differ from the properties already in use). The Office awaits Applicant's explanation (or amendment or any other appropriate action) regarding this issue.

Because these issues were not clearly and correctly raised in the previous Office Actions, this Office Action is made NON-final.

## **CLAIM REJECTIONS**

Claims 1-13, 15-25, 28-31, 34-43 are rejected because of the features of the prior art as noted in the previous section. The claims are rejected under 35 USC 102.
